

EYES MASK

3D PAPERCRAFT MODEL

lowPolysm

Hooray! You are about to start a wonderful and fun journey of assembling your own **lowPolysm EYES MASK** 3D papercraft model. Follow the simple instructions below and find out how easy and satisfying it is to create something with your own hands using only a few sheets of paper.

EYES MASK PARAMETERS

Model name:

EYES MASK

A4 | Letter size:

7 sheets

Colors:

COLOR1 3 sheets (eyeballs, pupils)

COLOR2 1 sheet (eyelids)

COLOR3 1 sheet (nose)

COLOR4 1 sheet (irises)

COLOR5 1 sheet (eyebrows, lashlines)

#Template parts:

26

Flaps to glue:

113

Level of difficulty:

Easy

WHAT YOU WILL NEED?

 <p>Hands</p>	 <p>Printer</p>	 <p>Cardstock 7 sheets</p>	 <p>Ruler</p>
 <p>Dried out pen</p>	 <p>Scissors</p>	 <p>Paper glue</p>	 <p>Elastic or lace</p>

WHAT NEEDS TO BE DONE?

Follow the steps below to successfully assemble your own personalized **lowPolysm EYES MASK** 3D papercraft model.

- 01. PRINT**
 - 02. SCORE**
 - 03. CUT**
 - 04. FOLD**
 - 05. GLUE**
 - 06. FINISH**
- ENJOY**

01. PRINT

- Select paper and colors for your paper model. It is recommended to use the paper with following parameters:

Paper size: **A4 - 21x29.7cm | Letter - 8.5x11"**

Paper thickness: **220 - 300 g/m² | 80 - 110 lb cover**

Paper colors:

or select paper colors of your choice.

- Print PDF template file on selected color papers with printing scale set to "Actual Size," "No scale," "100% size," or "1:1 ratio" based on your printer settings. For smaller kids (< 10 years) reduce the printing scale to 90%. Assembled mask will have a smaller size.

PDF template files:

[EYES-MASK-Template-COLOR1-3sheets.pdf](#)

[EYES-MASK-Template-COLOR2-1sheet.pdf](#)

[EYES-MASK-Template-COLOR3-1sheet.pdf](#)

[EYES-MASK-Template-COLOR4-1sheet.pdf](#)

[EYES-MASK-Template-COLOR5-1sheet.pdf](#)

Make sure that all PDF template files are printed with the same printing scale and settings set for all pages/colors!

Printing tips & tricks:

It can be difficult to see printed template lines and numbers on black or dark-colored paper. In this case, print the PDF template files on a regular white thin office paper and then glue it to the desired dark-colored paper. This technique can also be used for transferring templates on paper types that can't be used in common printers (e.g. crafting paper, textured paper, metallic paper, and heavier cardstock).

You can print PDF template files on any heavier colored or textured paper and create a 3D papercraft model based on your personal style, taste and creativity.

02. SCORE  Score all dashed — — — — — and dotted lines on printed template parts, with a ruler and dried out ballpoint pen or similarly dull item.

Scoring tips & tricks:

You can use also other tools to score paper e.g. sharp ruler corner, pin, nail, awl, or quilling pen. Be careful and gentle with scoring so you don't score through the paper. Try and test it on some scrap paper first.

You can score template parts using cutting machines like Cricut or Silhouette. Use attached SVG / DXF template files and related cutting software.

03. CUT  Cut template parts along all solid ————— lines.

Cutting tips & tricks:

More precise cuts can be achieved with a ruler and crafting knife. Place the ruler along the solid line and cut with the crafting knife along the ruler edge. A metal ruler is most appropriate for this technique rather than a plastic or wooden ruler.

You can cut template parts using cutting machines like Cricut or Silhouette. Use attached SVG / DXF template files and related cutting software.

04. FOLD

-  Fold all the lines you scored. Dashed — — — — lines create mountain folds, dotted lines create valley folds. Created folds are edges of your **lowPolysm** 3D papercraft model.

05. GLUE

-  Glue flaps to the edges with the same numbers. Firstly glue the flaps within individual template parts.

Example:

- Glue all connecting flaps between template part #1 and #2, then continue to #3 and so on. Individual steps and visual assembly guide is shown on the next pages.

Gluing tips & tricks:

All printed sides of the template parts are inside of the paper model. All flaps, lines, and numbers stay inside and should not be visible from the outside of the finished model.

Flap and edge numbers only indicate matching pairs that need to be glued together and do not represent the order of gluing.

Dry-fit the connecting parts first, then spread the glue evenly on the correct side of a flap.

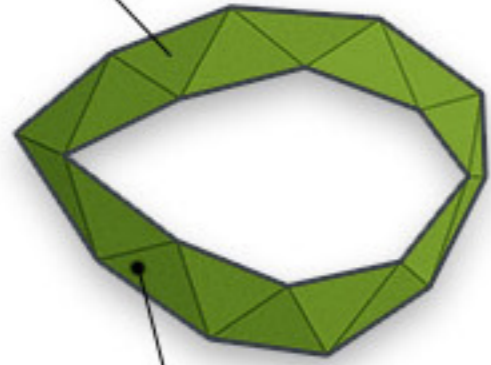

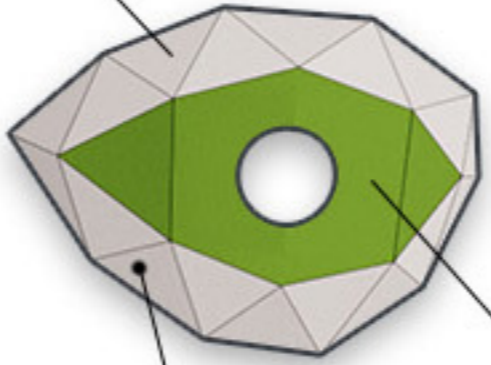

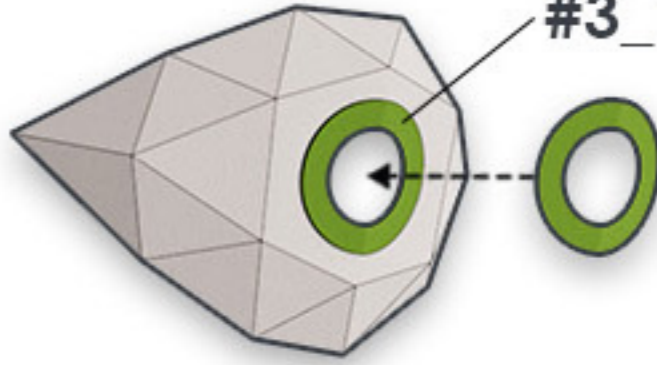

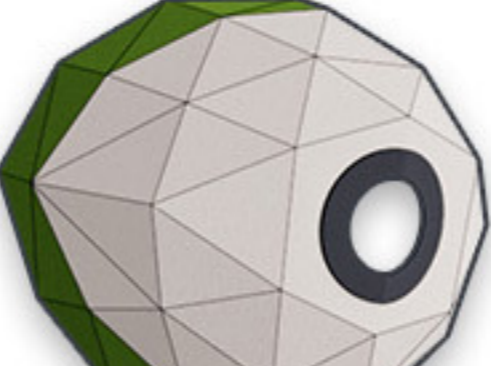

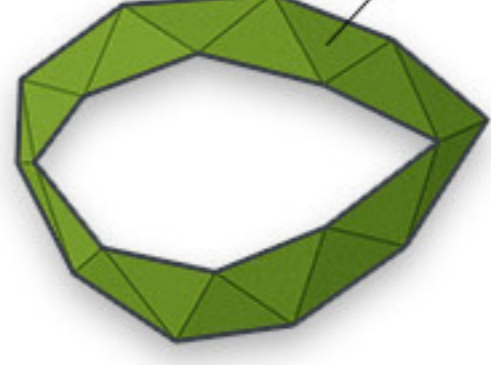

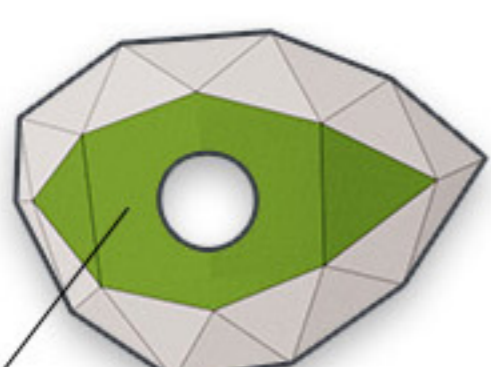

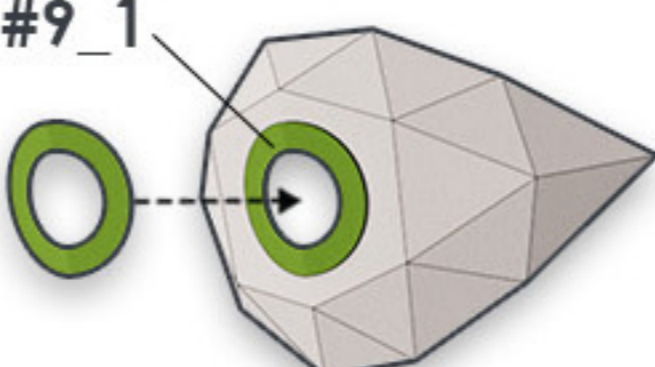

Always glue one flap at a time and wait until it dries out.

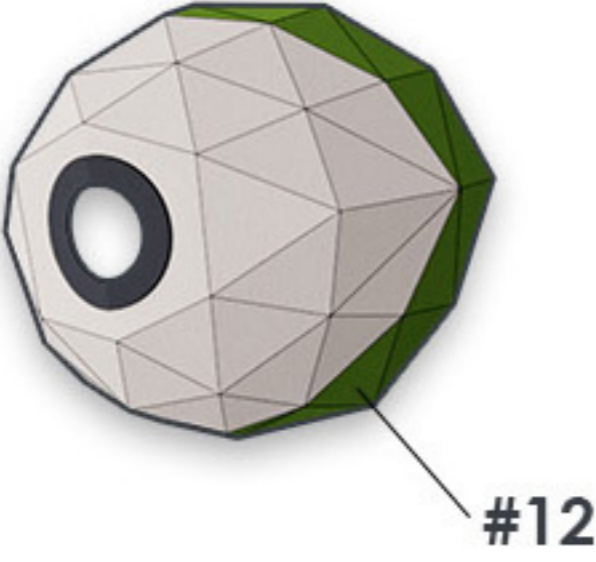

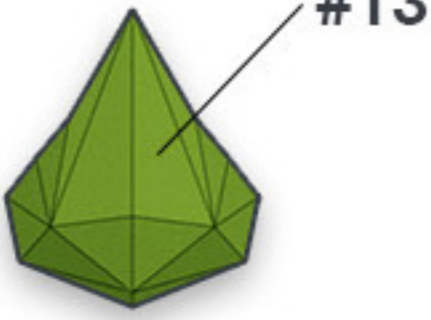

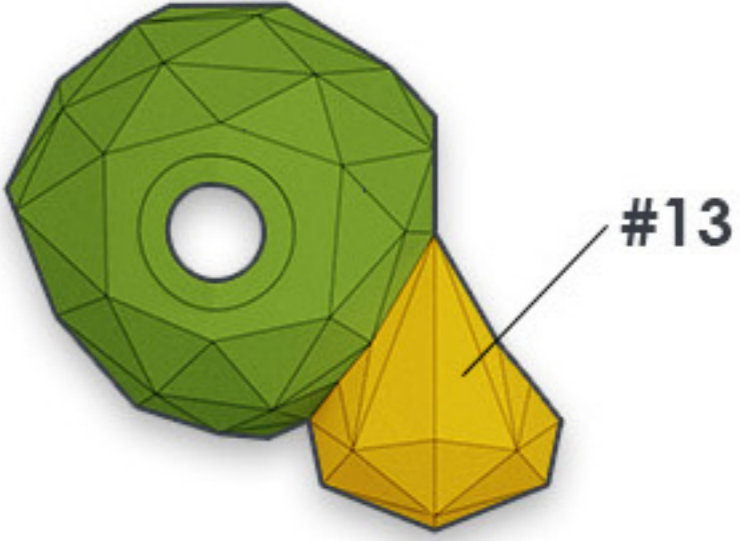

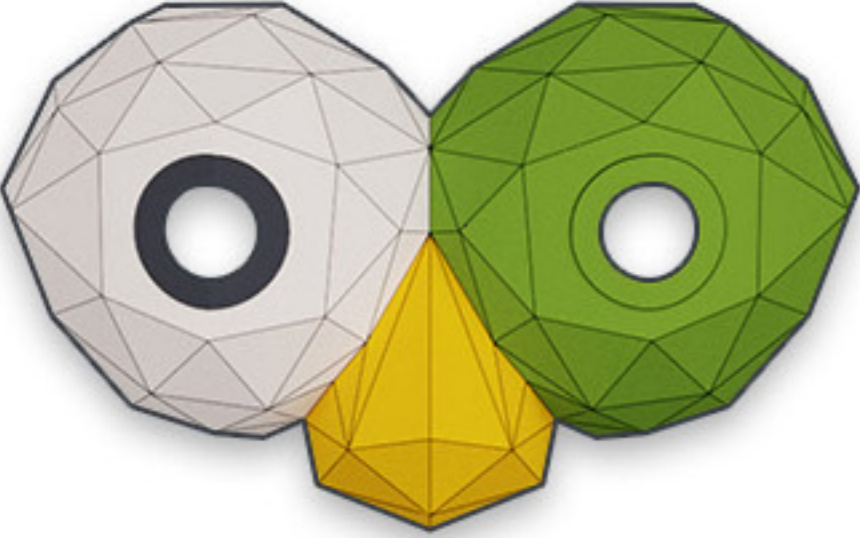

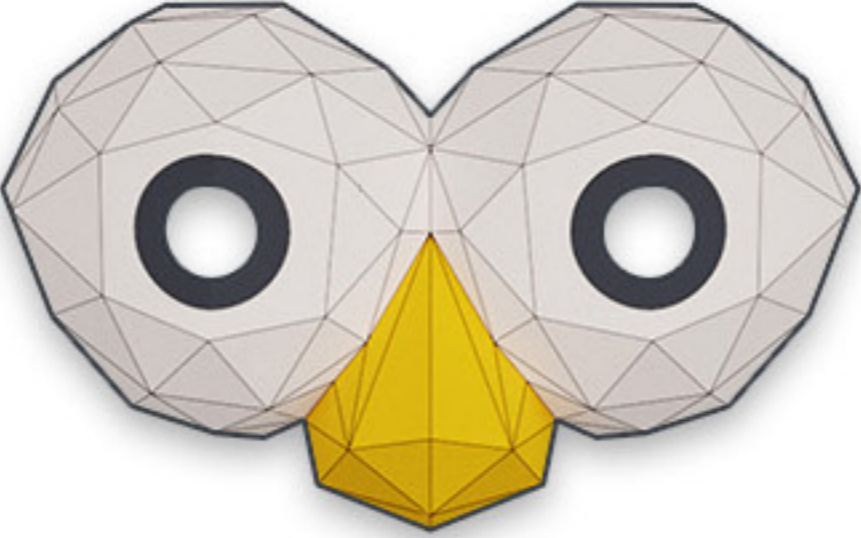

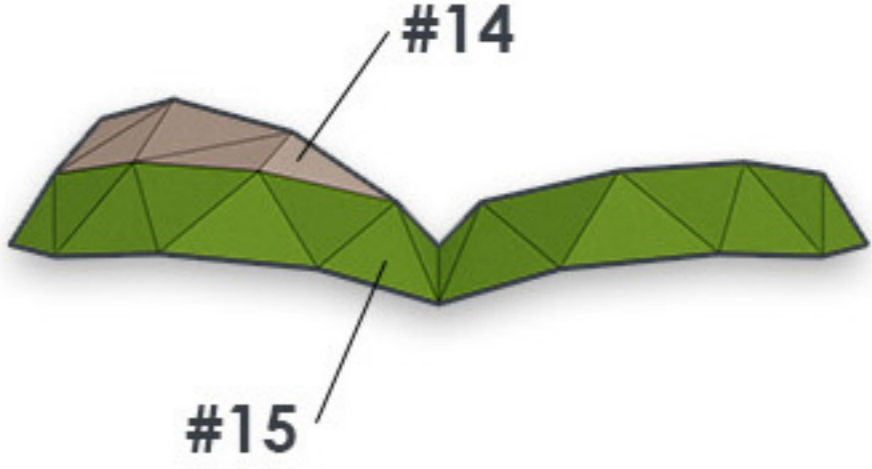

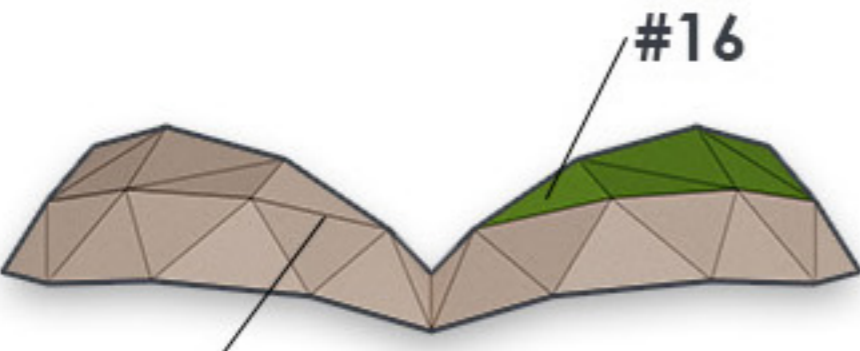

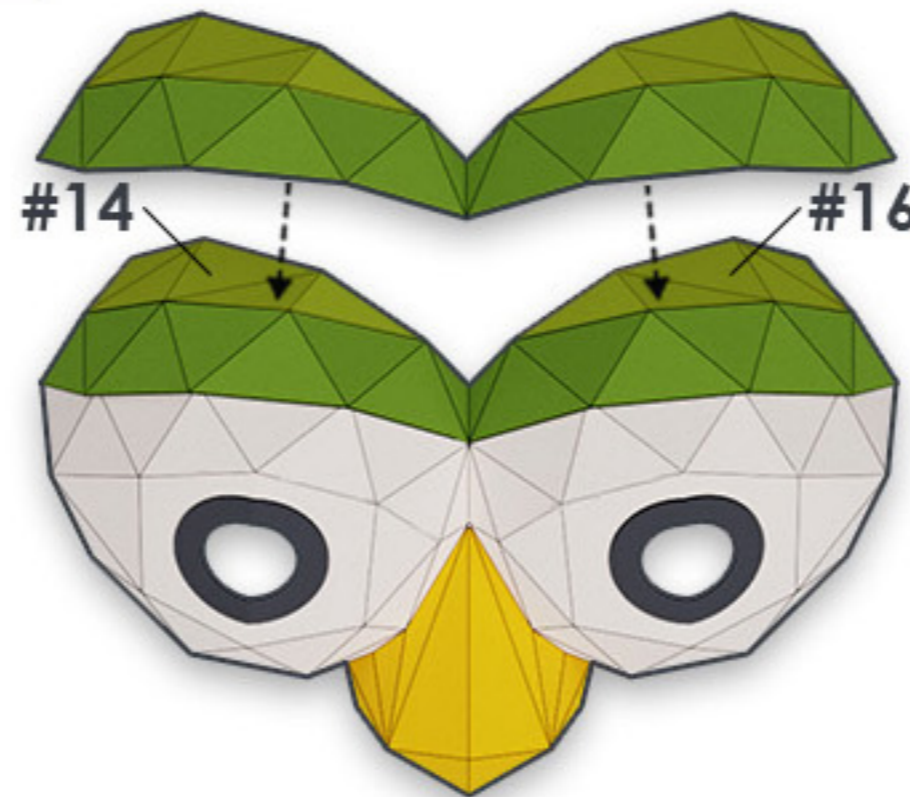

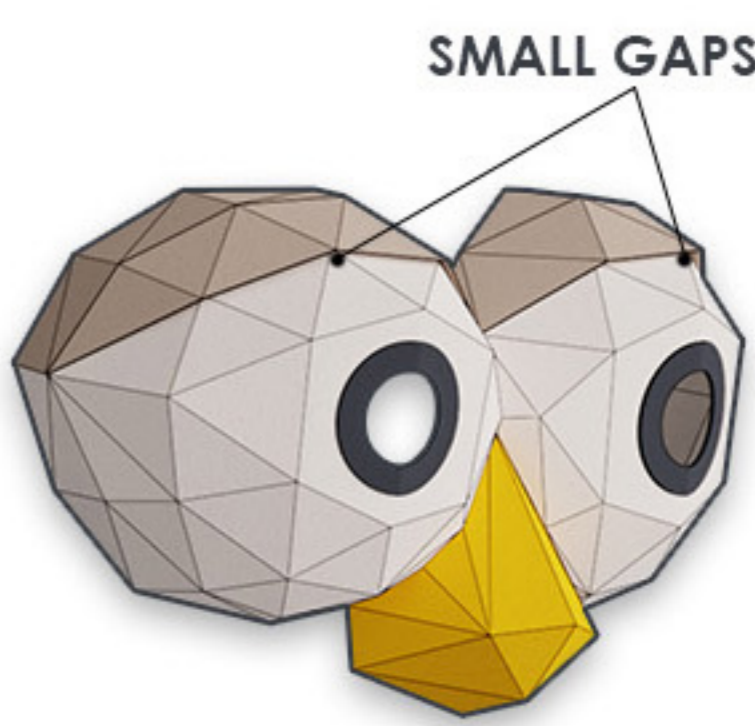

Be accurate when gluing flaps to the edges. Both corners of a flap must precisely match both ends of the corresponding edge.

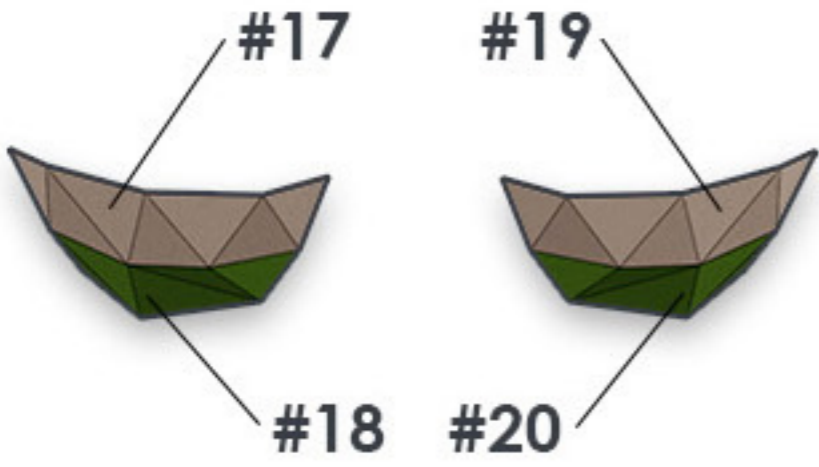

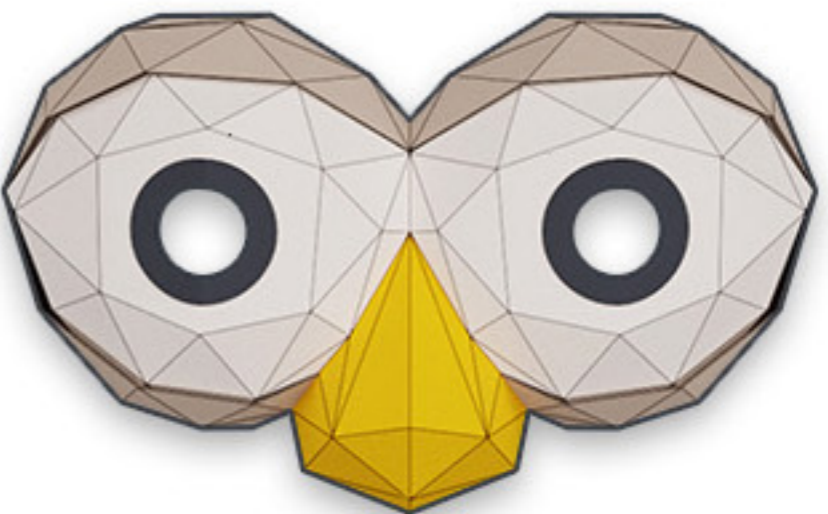

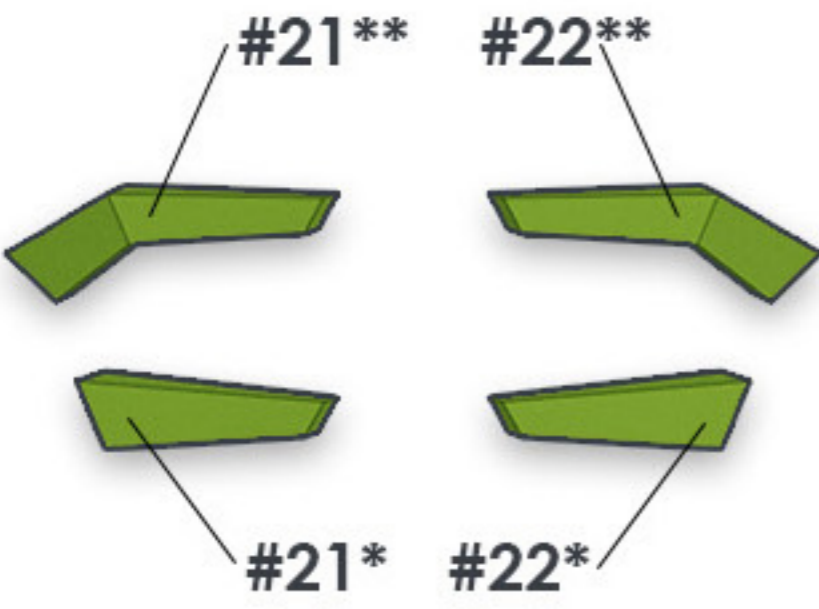

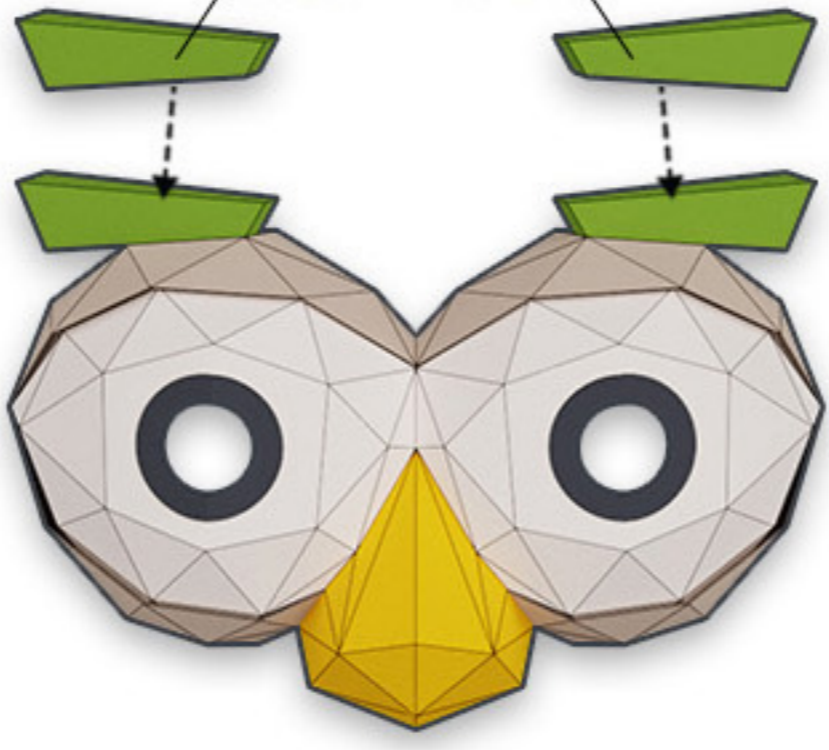

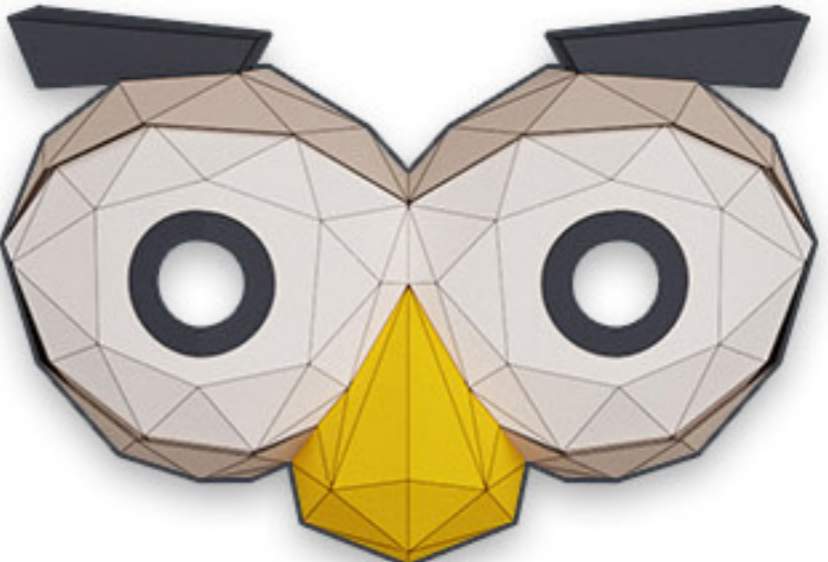

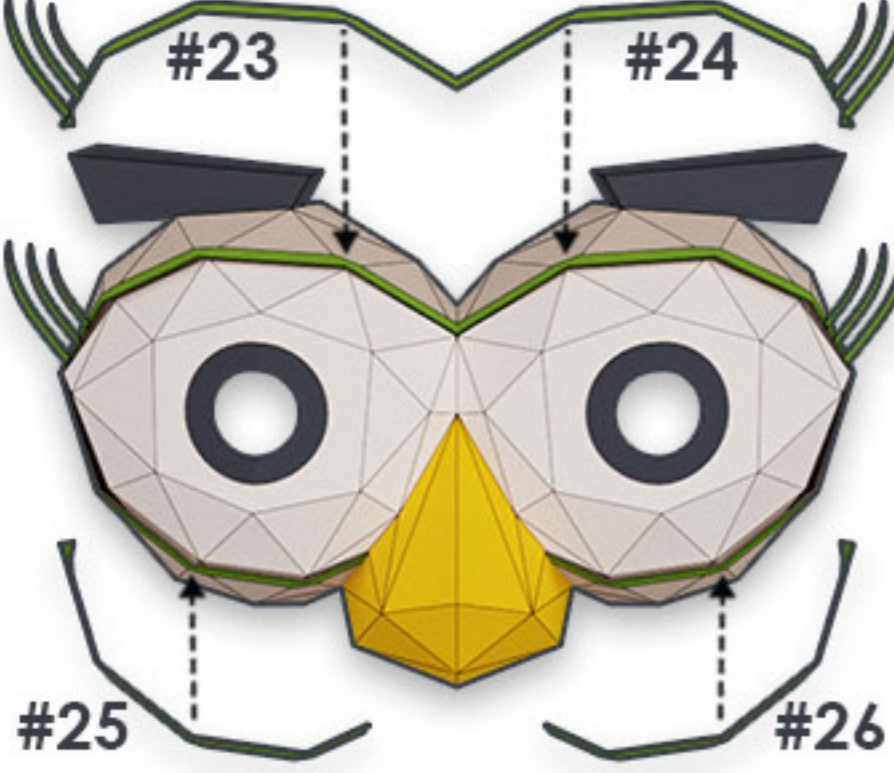

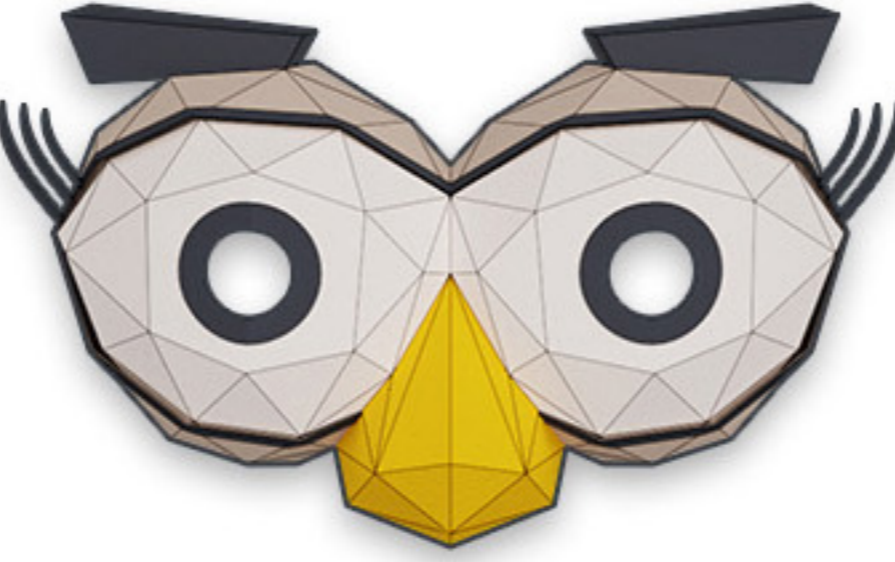

Less is more and this also applies to amount of glue you should use. Put few drops of glue on the flap spread it evenly, removing any excess glue with a toothpick or scrap paper. If using water-based glue, you can pour a small amount in a glass bowl and use a small paintbrush to apply the glue.

Use finger to apply glue on harder accessible flaps. This will simplify gluing inside of already assembled template parts which are harder to reach.

VISUAL ASSEMBLY GUIDE

<p>01.</p> <p>Assembly step number.</p>  <p>#1</p> <p>Template part to be assembled in the step.</p> <p>Start assembling the right eyeball. Assemble template part #1.</p>	<p>02.</p>  <p>#1</p> <p>#2_1</p> <p>Template part assembled in the first step.</p> <p>Choose pupil shape - templ. parts #2_1 - #2_7 and glue it to already assembled template part #1.</p>	<p>03.</p>  <p>#3_1</p> <p>Based on the chosen pupil shape select #3_1 - #3_9 and glue it to assembled pupil.</p>
<p>04.</p>  <p>#4</p> <p>#5</p> <p>Attach template parts #4 and #5.</p>	<p>05.</p>  <p>#6</p> <p>Attach template part #6. The right eyeball is assembled.</p>	<p>06.</p>  <p>#7</p> <p>Start assembling the left eyeball separately. Assemble template part #7.</p>
<p>07.</p>  <p>#8_1</p> <p>Choose pupil shape - templ. parts #8_1 - #8_7 and glue it to already assembled template part #7.</p>	<p>08.</p>  <p>#9_1</p> <p>Based on the chosen pupil shape select iris #9_1 - #9_9 and glue it to assembled pupil.</p>	<p>09.</p>  <p>#10</p> <p>#11</p> <p>Attach template parts #10 and #11.</p>

<p>13.</p>  <p>Attach the left eyeball to assembled nose and right eyeball.</p>	<p>14.</p>  <p>EYES MASK is assembled.</p>	<p>15.</p>  <p>#14 #15</p> <p>OPTION: EYELIDS For EYE MASK WITH EYELIDS, assemble upper eyelids separately. Glue parts #14 and #15.</p>
<p>16.</p>  <p>#16 #14+15</p> <p>Attach template part #16. The upper eyelids are assembled.</p>	<p>17.</p>  <p>#14 #16</p> <p>Apply glue only to the parts #14, #16 and glue eyelids to the eyeballs so they are aligned on the side where they are touching the face.</p>	 <p>SMALL GAPS</p> <p>Make sure that template part #15 is not glued to the eyeballs and creates overlapping SMALL GAPS between eyeballs and eyelids.</p>

<p>18.</p>  <p>Assemble lower eyelids separately. Glue template parts #17 to #18 and #19 to #18.</p>	<p>19.</p>  <p>Apply glue to the parts #18, #20 and glue eyelids to the eyeballs so they are aligned on the side where they are touching the face.</p>	<p>20.</p>  <p>EYES MASK WITH EYELIDS is assembled.</p>
<p>21.</p>  <p>OPTION: EYEBROWS For EYES MASK WITH EYEBROWS, select eyebrows shape and assemble them separately. Temp. parts #21*, #22* or #21**, #22**.</p>	<p>22.</p>  <p>Glue assembled eyebrows to the eyelids. Try different eyebrow locations to get the desired eyes expression.</p>	<p>23.</p>  <p>EYES MASK WITH EYEBROWS is assembled.</p>
<p>24.</p>  <p>OPTION: LASHLINES For EYES MASK WITH LASHLINES, glue lashlines on the edge of the eyelids. Parts #23, #24, #25, #26.</p>	<p>25.</p>  <p>EYES MASK WITH LASHLINES is assembled.</p>	<p>26.</p>  <p>Prick a hole on each side of the mask and thread through a piece of elastic. Knot or stitch the elastic inside of the mask and adjust it to the correct length to hold the mask snugly on the head.</p>

Congratulations! You are done with assembly. Your **lowPolysm** 3D papercraft **EYES MASK** is complete. Feel free to experiment with different colors, iris shapes, eyelid combinations, eyebrows and lashlines to get your unique **EYES MASK** look and eyes expression.

06. FINISH

Finish and decorate your assembled 3D papercraft mask using your creativity, personal style, and preferences. Feel free to leave it as it is or paint it over with a technique you like. Nice finishing results can be achieved with a brush and acrylic colors or with color sprays or markers. Creativity has no boundaries as well as your **lowPolysm** 3D papercraft model created with your own hands.

Finishing tips & tricks:

Excess glue or glue fingerprints visible on your final assembled model can be easily hidden by applying common finishing spray lacquer. Spray your entire papercraft model with a thin layer of transparent water-based finishing lacquer. Your paper model will get a perfect, clean glossy look and will become more durable and firmer.
